CUSTOMER CARE

All our door ranges are durable and easy to maintain.

However, like most products, they do have limitations in certain applications.

It is our recommendation that all end users are made aware that if **high temperatures** or **excessive water** are present this may cause the edges to peel back, which can result in failure of the product.

Areas for particular caution

- If doors are fitted adjacent to ovens, always ensure that they are shielded from heat by using heat deflectors. Doors must not be fitted any less than 750mm above a hob. Contact your supplier if you require more information.
- Never use appliances that generate heat, such as a toaster, directly underneath Integral doors.
- Never allow concentrated steam (e.g. from a kettle) to be released directly underneath Integral doors.
- Never allow Integral doors to become saturated with water.
- For cleaning use a damp cloth and a non-abrasive domestic cleaner, do NOT use bleach.

With the correct care your doors will give you many years of trouble free service. This customer care information does not affect your statutory rights.
